## 15" Wind Machine

### Specifications:

Equipment Size

Unfolded (cm):

H 67 x W 50 x L 52

Equipment Weight: (kg)

14

Shipping Type:

Flightcase

Shipping Size (cm):

H 53 x W 62 x L 53

Shipping Weight (KG):

28

Power Requirements:

Connector: 16A

Voltage TBC

Peak Amps TBC

Running Amps TBC

Noise: 75db at 3mtrs

Wind Speeds:

TBC

Suggested for set up

1 Person

Additional Info:

DMX Compatible and  
Truss/Stand mountable  
or free standing.

The 15" Wind Machine is a versatile and lightweight machine. Best suited for indoor use, it has a built in control unit and is also DMX compatible.

### How to set up and use the 15" Wind Machine

1. Position the fan safely either on floor/stage, stand (fig 4.) or truss (fig. 5).
2. Set the angle of the fan and tighten using the black wingnut (fig.6).  
Set the control unit to manual mode (fig.7) and set power output slider to minimum.  
Connect to a power supply and switch on red power switch (fig.8).
3. Using the slider, gradually increase the wind speed to desired power.

### Hints/Tips/Safety

1. The adjustable swivel yoke doubles up as a stand if floor mounting the machine.
2. The unit can be mounted aerially on a truss or scaffolding pole using a half coupler (not supplied as standard). Always use a suitable safety bond if mounting aerially.
3. Alternatively it can be mounted on a stand using a spigot (stand or spigot not supplied as standard). If using a stand with wheels ensure the wheels are locked to prevent the machine pushing backwards when in use.
4. This machine is DMX compatible – contact MTFX for more information on using this item via DMX.
5. Keep hands, hair and all objects away from the fan blades. Be aware of loose objects such as ties.
6. If smoke or debris are to be used in this effect. Always keep it in front of the blades. Taking it behind the fan risks injury or damage.
