

Technical Datasheet

Ashsoft - coarse display ash

MTFX Ashsoft Coarse display ash is an artificial flake ash used for dressing sets, scenes and areas of footfall.

Ashsoft is anti-static and does not 'travel' in thoroughfares, ensuring minimal clear-up is required. It is ready to use straight from the box and is great for areas of large coverage, scenes, stage setting or for use in tv or film.

The large flake size gives maximum coverage area.

Can be used in conjunction Ash Sparkle to give additional visual effect.

Available from stock and usually despatched within 24 hours of your order. Part code: SNASC
