

Technical Datasheet

Big Flame

Specifications:

Height: 170cm

Width: 70cm

Depth: 70cm

Equipment weight:
122kg

Shipping weight: 130kg

Power connector: 16A
Ceeform

Amps drawn: 1.6A

Decibels: tbc

Suggested for set up:
2 persons

Duration of effect:
Up to 2 seconds from a
13kg gas cylinder

Approx. height of effect:
Up to 20 metres

Additional requirements:
Propane gas
Controller

The Big Flame is an outdoor flame system which produces adjustable bursts of fire reaching heights of up to 20 metres.

It uses standard propane gas and can be controlled either via a push button control or using DMX via a switching box.

The Big Flame is ideal for permanent installation at theme parks and other outdoor attractions.

The Big Flame is currently unavailable for dry-hire.

It can either be hired along with an MTFX Technician to operate it or permanently installed at your venue. Please contact us for prices and further info.
