

Technical Datasheet

2mtr Burning Braziers

Specifications:

Equipment Size:
H 200 x W 61 x D 36 cm

Equipment Weight:
13.8 kg

Shipping Type: TBC

Suggested for Setup:
1 Person

Additional Information:

Requires LPG. (Not supplied for Dry Hire)

Black Cover for bottle available at additional cost.

Solenoids available for pulsing flames at additional cost.

The 2mtr Brazier is an impressive LPG Flame effect. Perfect for setting the scene at an event or on set. Can also be set up with solenoids (contact MTFX) to create a pulsating flame.

How to set up and use the 2mtr Brazier:

1. Stand the Brazier upright in a secure position on a flat level surface. Keep the Brazier a suitable distance from all flammable materials and substances.
2. Position the propane gas bottle (not supplied) on the flat plate to act as a counterweight. Fig.1
3. Connect the gas regulator Fig.2 ensuring valves are in the OFF position. Fig.3
4. **ALWAYS check for gas leaks**
5. Turn on the gas. Fig 4. Ignite the gas at arms length using a long handled lighting implement (not supplied) at the top of the brazier. Fig.5

Hints/Tips/Safety:

- Do not operate in high winds or adverse weather conditions.
- Ensure suitable fire-fighting equipment is available at all times, including CO2 extinguishers and fire blankets.
- Make sure the brazier is secured and on a level surface. Position it where it will not be tipped over.
- Keep a safe distance between flammable substances/materials, audience/performers and flame.
- Supervise at all times when in use.
- Contact us to discuss installation of Solenoids for pulsing flame effects.
- We can supply black coverings to hide LPG bottle at additional cost
