

Technical Datasheet

Cage of Death (Faraday Cage)

The Cage of Death is the name of a High-Voltage special effect. The cage itself is more commonly known as a Faraday cage. A Faraday cage shields the person or object inside from electric fields. The Cage of Death is a stunt which uses a Tesla coil to fire high-voltage bolts of electricity towards a Faraday cage with a person inside without harming them.

Specifications:

Power connector :
M6 Ring

Suggested for set up :
2x MTFX Technicians

HIGH VOLTAGE EFFECT

Any user

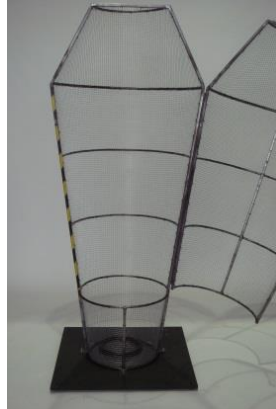

**- with electrical
devices such as
pacemakers or
electrical cardiac
implants**

**- with epilepsy,
heart conditions or
related illnesses**

**- who is pregnant,
or may be pregnant**

**- who is under the
age of 14**

**will not be allowed
to enter the Cage
of Death.**

Coffin Faraday Cage

Height : 2.2mtrs
Width : 0.8mtrs
Depth : 0.8mtrs
Weight : 33kg

Tubular Faraday Cage

Height : 2.0mtrs
Width : 0.9mtrs
Depth : 0.9mtrs
Weight : 40kg

Sarcophagus Faraday Cage

Height : 2.0mtrs
Width : 0.8mtrs
Depth : 0.8mtrs
Weight : 23kg

The Cage of Death may only be operated by trained and qualified MTFX operators. For information and prices please contact us. This equipment cannot be dry-hired.
