Very realistic

Avoid contact with eyes

Do not ingest

MTFX's Cobweb Effect is a fantastic looking realistic dusty cobweb effect. You can make any product look as though its old and covered in spider's webs. The effect will last as long as you require it to and will last under studio lighting! It's easy to remove and can be made even easier and more effective when assisted by our Eco Anti Spot.

1. Remove the cap from the canister.

2. Shake the Cobweb Effect canister well.

3. (MTFX's Eco Anti Spot is the perfect assistant as a prime coat to make it easier to remove frost effect.)

4. Spray the Cobweb Effect onto the desired area. Spray at roughly 80cm away from the desired area you wish to coat. (fig. 4)

5. Cobweb Effect will set instantly!
