

Technical Datasheet

Drop Effect

Specifications:

Dimensions:
70 x 35 x 35mm

Weight: 50ml

Packaging: Plastic Tub

Additional Information:

Easy to clean up

Very realistic

Avoid contact with eyes

Do not ingest

MTFX's Drop Effect is a fantastic looking, realistic droplet effect. Simply use the dipstick in the solution and apply to any prop you require the drop to be on. The effect

1. Remove the dipstick from the side of the plastic container.
2. Unscrew the lid on MTFX's drop effect and remove the safety cap.
3. Dip the stick into the solution.
4. Put the dip stick with the solution on it, onto the area you wish to add the droplet effect.
5. The solution will form from the stick into a realistic water droplet at the bottom of the dipstick.
6. Once you are happy with the size of the droplet remove the stick and use a piece of tissue to wipe the stick down.
7. Once finished the droplet can be wiped off of the surface easily.
