## Frost Effect

### Specifications:

Dimensions:  
200 x 60 x 60mm

Weight: 400ml

Packaging: Canister

Additional Information:

**Easy to clean up (even easier when primed with eco anti spot)**

**Very realistic**

**Avoid contact with eyes**

**Do not ingest**

MTFX's Frost Effect is a fantastic looking realistic frosting effect. You can make any product look as though it came straight out of freezing. The effect will last as long as you require it to and will last under studio lighting! It's easy to remove and can be made even easier and more effective when assisted by our Eco Anti Spot.

1. Remove the cap from the canister.
2. Shake the Frost Effect canister well.
3. (MTFX's Eco Anti Spot is the perfect assistant as a prime coat to make it easier to remove frost effect.)
4. Spray the Frost Effect onto the desired prop. Spray at roughly 20cm away from the desired area you wish to coat. (fig. 4)
5. Frost Effect will set almost instantly!
