

Technical Datasheet

Handheld Blower

The handheld air blower is ideal for creating smaller wind effects.

How to set up and use the Handheld Blower

1. Plug in the power supply
2. Tool speed is increased by increasing pressure on the trigger. To start the unit, simply pull the trigger. Release the trigger to stop.
3. For continuous operation, pull the trigger and then push in the lock button. To release the unit from the locked position pull the trigger fully, then release it.
4. A speed control screw is provided so that unit speed can be changed at the fully-pulled trigger position. Turn the speed control screw clockwise (+) for higher speed, and counterclockwise (-) for lower speed.

Safety

Before plugging in the tool, always check to see that the trigger switch actuates properly and returns to the "OFF" position when released.

Specifications:

Height : 23cm

Width : 18cm

Depth : 50cm

Shipping weight : 2.5kg

Voltage : 240v

Power connector : 16A

Amps drawn : 2.8A

Packaging type : tbc

Noise : 75db at 3mtrs

Suggested for set up :
1 person

Duration of effect :
Continuous

Air power :
1mtr : 19.0mph
5mtrs : 1.8mph
10mtrs : 0.0mph
