## Rubber Glass

### Specifications:

Dimensions:  
500 x 410 x 7mm

Weight: 1.4kg

Packaging: Box

Additional Information:

**Easy to tear**

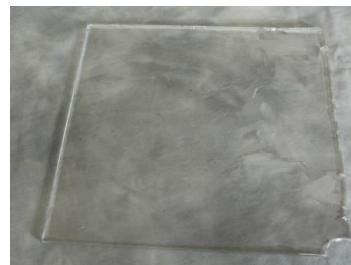

**Easy to clean up**

**Very realistic**

MTFX's rubber glass is a fantastic visual effect for safely having broken glass. It looks like real shards a fantastic substitute for walking safely over glass without causing any damage. The glass will tear so you can create your own size and look as though it has sharp edges.

How to use MTFX's rubber glass;

1. Carefully remove the rubber glass from the box, and slowly take off the protective covering.
2. Firmly hold the glass and tear a portion to the required size. (fig 2).
3. The glass can be torn into different sizes and shapes.(fig 3).
4. Place glass in areas it is required; for example if walking on the glass place on the floor and walk through the rubber shards.(fig 5).
