

Specifications:

Dimensions:
142 x 50 x 1mm

Weight: 15g

Additional Information:

Very realistic

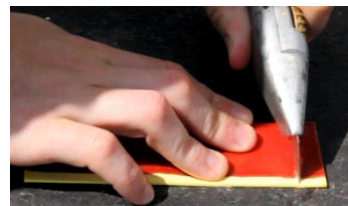

DO NOT touch the lit end.

Lasts approx. 30mins

MTFX Smoking Strips are an easy to use smoking effect. They are perfect for stage productions or enclosed spaces requiring a safe, easy to use smoke effect. (fig.4)

How to use Smoking Strips

1. Take the Smoking Strip out of the packaging and cut to your required size. The density and volume of the smoke is determined by the size of the cutting. (fig.1)
2. Once happy with the size, using a lighter or flame source you can light the yellow end of the stick. (fig.2)
3. The yellow section of the stick will burn away and this will cause the smoke effect to start. (fig.3)
4. The effect lasts approx. 30mins.
