

Technical Datasheet

Snow Flocking Machine

Specifications:

Equipment Size:
55Hx 30W x 30L cm

Equipment Weight: 12kg

Shipping Type:
FlightCase

Shipping Size:
70H x 55W x 55L cm

Shipping Weight: 35kg

Power connector:
16A to IEC

Peak Amps: 2.0

Additional
Requirements: Snow
Flock 10kg bag or Paper
Frost

Suggested for setup:
1 person

Flocking creates a beautiful snowy effect that is perfect for all manner of winter effects and can be used on a variety of objects to create a realistic snow effect.

How to set up and use the Snow Flocking Machine

1. Prepare area/item/tree that you wish to flock
2. Connect IEC power cable and XLR cable (Fig 3.)
3. Open grill hoses in base of the bucket by pulling black knob.
4. Turn on using controller to check blades rotate. Switch off again once checked.
5. Connect snow flock hose from to handle
6. Add 3-4 heaped, double handfuls of snow flock in to the bucket
7. Connect hose adapter to hosing and then to trigger (Fig.4)
8. Using water only, wet down your desired area/item/tree
9. Using the silver controller you can now turn on the flocking machine and begin to flock. Making sure the water is on also. (Fig 5.)
10. Once you have finished with your coverage, turn off the flocking machine and lightly spray the area with water to help bond the snow flock with the item.

Safety, Hints & Tips

- When Disconnecting power cables ensure to hold down button upon release.
- Flocking effects can last up to 2 weeks outdoors and longer in and indoor location.
- Do not use in the rain.
