

Technical Datasheet

Vapour Effect

Specifications:

Dimensions:
80x 30 x 30mm

Weight: 2 x 25ml

Packaging: Bottles

Additional Information:

Easy to clean up .

Very realistic

Avoid contact with
eyes & skin

Do not ingest

Corrosive

MTFX's Vapour Effect is MTFX's realistic vapour effect. It is perfect for photography or any video production where you require a realistic vapour effect on demand. The effect starts immediately once solution B is applied to solution A. The only limitation is your imagination to what you can make have a realistic vapour/smoke effect from it.

1. Remove the bottles from the packaging and then remove the caps.
2. Using solution A, squeeze the bottle to add the first part of the effect to the desired area/prop. (fig.2) (Do not use on skin)
3. Apply solution B to solution A. (fig 3)
4. A little will go a long way with this effect so use sparingly!
5. Vapour Effect will start smoking instantly!
