ECO Snow

Specifications:

Flake size: 5-10mm

Colour: White

Coverage: approx.
3sq.mtrs

Weight: approx. 0.8kg

Shipping weight: 0.9kg

Packaging type: Carton

MTFX Eco Snow is an artificial flake snow made from corn starch. It is 100% environmentally friendly being fully biodegradable and water soluble making it ideal for outdoor usage.

Eco Snow is perfect to create a falling snow effect and looks great as laid ground cover or for set dressing. Eco Snow does not tread into carpets ensuring minimal clear-up is required, although it becomes slippery when wet. It may need fluffing up as it comes out of the box and is perfect for creating a realistic snow effect.

Clean up by simply hosing down, vacuum, or leave to biodegrade naturally.

Available from stock and usually dispatched within 24 hours of your order.

Part code: SNECO1
